WORK EXPERIENCE: Worked at Raibs Infotech as a Full Stack Developer in 6 Months.

I contributed to developing and maintaining both front-end and back-end systems. I worked on building dynamic, user-friendly applications, ensuring seamless integration between server-side and client-side functionalities, and optimizing performance.

PROJECTS

COMPREHENSIVE HOSTEL MANAGEMENT : Developed a Hostel and Mess Management system with Admin features for student registration, attendance, fee updates, and parcel management. Students can view attendance, update details, add visitors, register complaints, and track parcels.

COMPLAINT PORTAL : This project based on mobile-first responsive Complaint Management System (CMS) enabling users to submit complaints, upload images, track complaint status, and stay updated with news. Features include user authentication, complaint tracking, and image upload for efficient complaint handling.

REALESTATE WEBSITE : Developed 'Realestate' a comprehensive platform for house sales, apartment rentals, selling flats and room rentals. Designed and implemented features to enhance user experience, streamline property listings, and facilitate seamless interactions between buyers, sellers, and renters.

***PORTFOLIO HIGHLIGHTS :** I work on personal and college student projects to showcase on my portfolio website. The link is provided below.
